DETAILED ACTION

Claim Objections

1. Claim 1 is objected to because of the following informality: the term "be" in claim 1, line 11, should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3, 5 and 7-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Tegler et al. (WO 98/56181).

Regarding claims 1, 12 and 13, Tegler et al. disclose a telecommunications system comprising a broadband wired network (between the distribution center DC and the set-top box STB) and a narrower-band wired network (between the mobile switching center MSC and the interactive center IC) for transmitting broadcast and on-demand services, and a network adapter (IC) between these two, the narrower-band wired network being configured to transmit the services to at least one terminal (STB), wherein the network adapter is operationally connected to a base station (BTS) of a wireless local area network operated by the broadband wired network; the terminal is inherently operationally connected to a transceiver of the wireless local area network (since communication occurs in both directions between the terminal and the base station); and data transmission from the terminal to the broadband wired network is configured to take

Art Unit: 2685

place through the network adapter in the wireless local area network. See Figure 1, page 4, line 14 – page 6, line 14, and the Abstract.

Additionally regarding claims 1, 12 and 13 as well as claims 2, 3, 5 and 9-11, please note that the use of the term "configured" in these claims renders the corresponding recitations intended use limitations. Accordingly, the claimed system is not distinguished from Tegler et al. by these limitations. See M.P.E.P. 2114 and *Ex parte Masham*, 2 USPQ2d 1647 (1987).

Regarding claim 7, Tegler et al. disclose that the terminal comprises a set-top-box connected to a TV.

Regarding claim 8, Tegler et al. disclose that the terminal comprises a video interface card (video decoder) connected to a computer. See Figure 2.

Allowable Subject Matter

- 3. Claims 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 4. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to disclose a combination of elements in a telecommunication system, including a wireless LAN that is based on spread spectrum technology and signaling parameters generated by the network adapter that includes codes for determining a signaling channel, as required by claim 4; a broadband wired network, narrower-band wired network and a network adapter between these two forming

Art Unit: 2685

an HFC network (Hybrid Fibre Coax), the broadband network being an optical fiber network and the narrowband network a coaxial cable network, as required by claim 6.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kwok (US 5,734,652) discloses an ATM cable network including several set top boxes.

Howe et al. (US 5,818,438) disclose a system that provides interactive TV services.

Zendle et al. (US 6,628,627 B1) disclose a wireless broadcasting system including a computer control system that controls a set top unit and multimedia devices.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sam Bhattacharya whose telephone number is (703) 605-1171. The examiner can normally be reached on 8:30 a.m. to 5:00 p.m., Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward F. Urban can be reached on (703) 305-4385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
